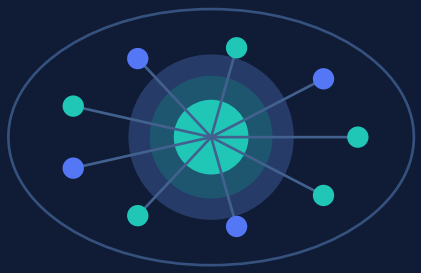
INTELLIGENCE THAT MOVES BUSINESS FORWARD

AI • DATA • AUTOMATION • HUMAN-CENTRED DESIGN



LIVE INSIGHTS

Meet ALISHA

Smarter systems. Stronger businesses. ALISHA is a future-focused technology company concept that helps organisations turn complex operations and data into clear, useful action through artificial intelligence, automation and connected digital systems.

AI-POWERED INSIGHT

Turn business data into practical decisions.

CONNECTED OPERATIONS

Bring people, processes and information together.

PREDICT BEFORE FAILURE

Spot patterns early and plan maintenance.

HUMAN-CENTRED TECH

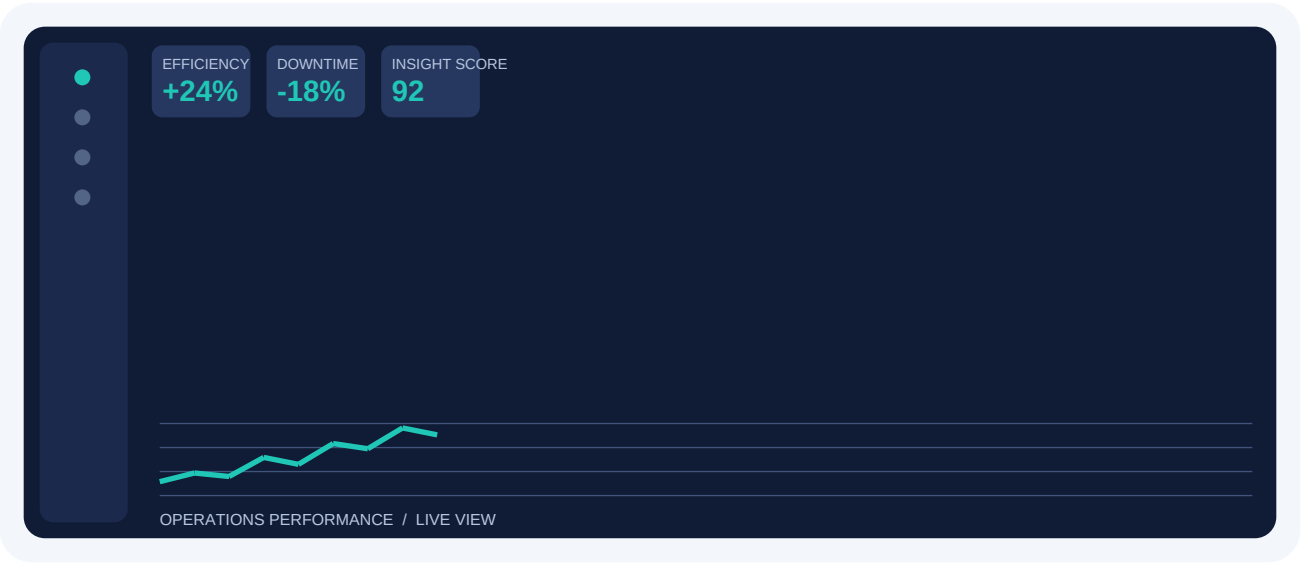
Build tools that support people, not replace judgement.

OUR PURPOSE

Make advanced technology understandable, useful and accessible—so businesses can work more efficiently, respond faster and grow with confidence.

About ALISHA

A modern technology partner built around one idea: better decisions begin with better-connected information.



Our vision

To become a trusted technology brand that helps organisations use AI responsibly and create smarter, more resilient operations.

Our mission

We design practical digital solutions that connect data, people and processes. We focus on measurable outcomes, clear communication, privacy and continuous improvement.

INNOVATION
Explore useful ideas and emerging technology.

TRUST
Respect data, privacy and transparency.

IMPACT
Measure results that matter to people.

COLLABORATION
Build with clients and their teams.

What we do

From a single workflow to a connected operation, ALISHA focuses on technology that solves real business problems.

AI & DATA ANALYTICS

Convert raw information into trends, forecasts and clear dashboards.

PREDICTIVE MAINTENANCE

Use equipment data to identify warning signs and plan servicing.

BUSINESS AUTOMATION

Reduce repetitive admin work and connect routine processes.

DIGITAL TWINS

Create a virtual view of a process or asset to understand performance.

SMART CUSTOMER EXPERIENCE

Use responsible insights to improve support and service journeys.

SYSTEM INTEGRATION

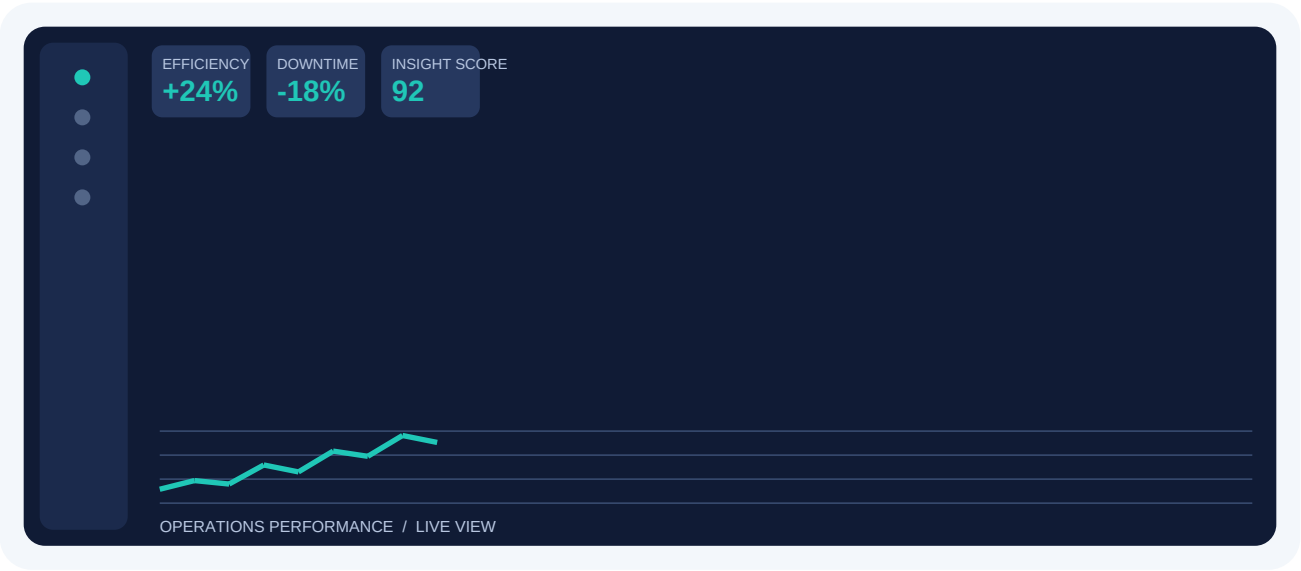
Connect software, teams and data so information flows smoothly.

Our approach

Understand the challenge → map the process → prepare quality data → design and test a solution → measure results → improve continuously.

Featured solution: AURA

An ALISHA concept product for smarter factory and business operations.



AURA — AI Operations Intelligence

AURA brings equipment signals, production information and operational records into one view. It helps teams notice unusual patterns, understand possible risks and decide what to investigate next. It supports human decision-making; it does not make safety-critical decisions on its own.

01 CONNECT Collect relevant machine and process data.	**02 UNDERSTAND** Analyse patterns and compare performance.
03 ALERT Flag unusual changes for team review.	**04 IMPROVE** Plan action and track the outcome.

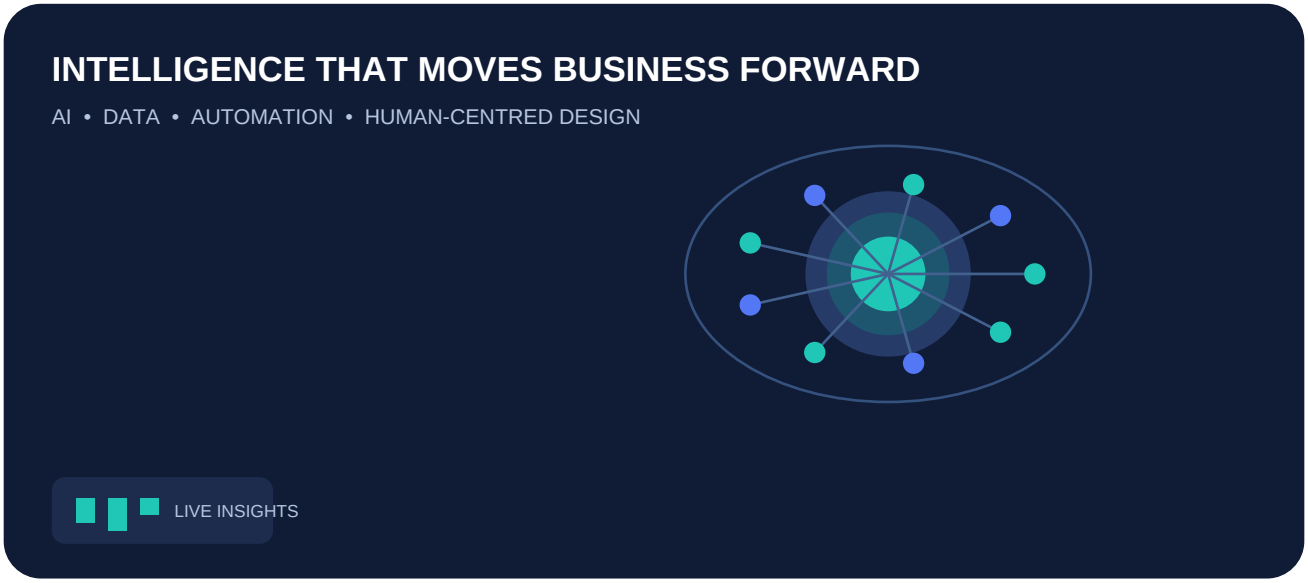
Potential value for a business

Earlier visibility into issues • more planned maintenance • less avoidable disruption • clearer operational reporting • better-informed decisions.

Illustrative concept only: results depend on data quality, implementation, staff training and the specific business environment.

Built for what’s next.

Technology should make progress practical. ALISHA brings curiosity, structured thinking and responsible AI together to help organisations take their next step.



A note from the founder

ALISHA KHAN
Founder & Vision Lead (proposed brand profile)

“My goal is to build technology that solves meaningful problems. I believe strong systems begin with clear thinking, reliable data and a commitment to continuous learning.”
